'set theory

November 11th, 2019 - a set is pure if all of its members are
sets all members of its members are sets and so on for
example the set containing only the empty set is a nonempty
pure set in modern set theory it is mon to restrict attention
to the von neumann universe of pure sets and many systems of
axiomatic set theory are designed to axiomatize the pure sets
only'

'natural number

April 4th, 2020 - von neumann ordinals in the area of
mathematics called set theory a specific construction due to

john von neumann defines the natural numbers as follows set 0 the empty set define $s(a)$ for every set a $s(a)$ is the successor of a and s is called the successor function by the axiom of infinity there exists a set which contains 0 and is closed under the successor'
